**GLOBAL FINANCIAL INVESTMENTS HOLDING SAOG
AND ITS SUBSIDIARIES**

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE PERIOD ENDED 30 SEPTEMBER 2025 (continued)**

1 Legal status and principal activities

Global Financial Investments Holding SAOG (“the Company” or “Parent Company”) is a Omani Public Joint Stock Company, incorporated and domiciled in the Sultanate of Oman. The Company’s head office is located in Muscat and its registered address is at P.O. Box 978, Muscat, Postal Code 100, Sultanate of Oman.

The Parent Company is primarily engaged in holding investments through its subsidiaries and associate companies which are engaged in the businesses of brokerage, investment consultancy services, educational and training services, logistics services, leasing and financing services, manufacturing of aluminums products, and production and manufacture of industrial gas.

The Parent Company’s principal place of business is located at Ruwi, Muscat, Sultanate of Oman.

These consolidated financial statements include the result of operations and assets and liabilities of the Parent Company and its subsidiaries (together referred to as “the Group”). The structure of the Group is as follows:

Ownership	30/09/2025	2024	Principal Activity
Subsidiaries			
Incorporated in the Sultanate of Oman			
Global Financial Securities LLC	100.00%	100.00%	Brokerage and investment
First International LLC	100.00%	100.00%	Investments
Oman Education and Training Investment Company SAOG (“OETI”)	37.68%	37.68%	Education and training
Oman International Sayarat Co. LLC (under liquidation)	22%	22%	Repairs and maintenance of vehicles
Incorporated in the United Arab Emirates			
Ithra’a Capital LLC	100.00%	100.00%	Investments
Associates			
Incorporated in the Sultanate of Oman			
Al Madina Logistics SAOC	38.63%	38.63%	Logistic services
Sohar Gases Company LLC	33.33%	33.33%	Production and manufacturing of industrial gas
National Aluminums Products SAOG	20.60%	20.60%	Manufacturing of aluminums products
United Finance Company SAOG	25.00%	25.00%	Leasing and financing services
A’Sharqiyah University SAOC	20.00%	20.00%	Education and training
Intaj Suhar for Advanced Manufacturing LLC	35.56%	35.56%	Manufacturing of molds and engineering consultancy
Incorporated in the Arab Republic of Egypt			
EAC – Themar Securities Brokerage	22.60%	22.60%	Brokerage and investment

Although the Parent Company held 37.68% in OETI and 22% in Oman International Sayarat Co. LLC (under liquidation) it has majority voting rights and therefore determines control in accordance with IFRS – 10 *Consolidated Financial Statements*.

2 Basis of preparation and adoption of new and amended IFRS Accounting Standards

Basis of preparation

Statement of compliance

The consolidated financial statements of the Group have been prepared in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board (IASB), the requirements of the Commercial Companies Law of 2019, as amended, and the relevant disclosure requirements by the Financial Services Authority (FSA) of the Sultanate of Oman. The management does not expect the adoption of the Standards and Interpretations listed above to have a material impact on the financial statements of the Group in future periods.

**GLOBAL FINANCIAL INVESTMENTS HOLDING SAOG
AND ITS SUBSIDIARIES**

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE PERIOD ENDED 30 SEPTEMBER 2025 (continued)**

2 Basis of preparation and adoption of new and amended IFRS Accounting Standards (continued)

Functional and presentation currency

The consolidated financial statements are presented in Omani Rial (RO) which is also the functional currency of the Group. All amounts have been rounded to nearest Rial Omani (RO), unless otherwise indicated.

New standards, amendments and interpretations to existing IFRS Accounting Standards effective 1 January 2025

The following new standards, amendments to standards and interpretations have become effective for the first time for the reporting periods beginning on or after 1 January 2024:

Amendment to Standards

- Amendments to IAS 1 for:
 - (a) Classification of Liabilities as Current or Non-Current
 - (b) Non-Current Liabilities with Covenants
- Amendments to IFRS 16 for: Lease Liability in a Sale and Leaseback
- Amendments to IAS 7 and IFRS 7 for: Supplier Finance Arrangements
- Amendments to IAS 12 for: International Tax Reform - Pillar Two Model Rules

The Group has adopted all of the above amendments for the first time in the reporting year and has accounted for and disclosed in the financial statements as far as these amendments were applicable to the Group. These amendments did not have any material impact on the presentation of the amounts and disclosures in the financial statements.

Standards, Amendments and interpretations to existing IFRS Accounting Standards that have been issued but are not yet effective

At the time of authorization of these financial statements, the following IFRS Accounting Standards, amendments to standards, and interpretations have been issued but not yet effective. The Group will adopt these standards, amendments and interpretations in future reporting years as indicated below:

Standards/Amendments to Standards	Effective date
Amendments to IAS 21 for: Lack of Exchangeability and consequential amendments of other related standards	01 January 2025
Amendments to IFRS 9 and IFRS 7 for: Classification and Measurement of Financial Instruments	01 January 2026
IFRS 18: Presentation and Disclosures in Financial Statements (new standard) and consequential amendments of other related standards	01 January 2027
IFRS 19: Subsidiaries without Public Accountability: Disclosures (new standard)	01 January 2027

Management believes that adoption of the above new standards and amendments, which are in issue but not yet effective, is not likely to have any material impact on the presentation and disclosure of items in the financial statements of the Group for these future periods. For the new standard IFRS 18, applicable to annual reporting periods beginning on or after 1 January 2027, the Group is currently performing an impact assessment.

3 Material accounting policy information

Overall consideration

The material accounting policies applied in the preparation of these consolidated financial statements are set out below. These accounting policies have been applied consistently by the Group to all the periods presented.

GLOBAL FINANCIAL INVESTMENTS HOLDING SAOG AND ITS SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE PERIOD ENDED 30 SEPTEMBER 2025 (continued)

3 Material accounting policy information (continued)

Basis of consolidation

Subsidiaries

Subsidiaries are all entities (including structured entities) over which the Group has control. The Group controls an entity when the Group is exposed to or has rights to variable returns from its involvement with the subsidiary and has the ability to affect those returns through its power over the subsidiary. In the consolidated financial statements of the Group, subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

The Group uses the acquisition method of accounting to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the fair values of the assets transferred, the liabilities incurred or assumed at the date of exchange and the equity interests issued by the Group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Acquisition - related costs are expensed as incurred.

Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. On an acquisition-by-acquisition basis, the Group recognises any non-controlling interest in the acquiree at fair value.

In the Parent Company, investments in subsidiaries are accounted for at equity basis.

The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the identifiable net assets acquired is recorded as goodwill. If the total of consideration transferred, non-controlling interest recognised and previously held interest measured is less than the fair value of the net assets of the subsidiary acquired in the case of a bargain purchase, the difference is recognised directly in the consolidated statement of profit or loss.

Inter-company transactions, balances and unrealised gains / losses on transactions between Group companies are eliminated. The accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

Transactions with non-controlling interests

The group treats transactions with non-controlling interest as transactions with equity owners of the Group. For purchase from non-controlling interest, the difference between any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in consolidated shareholders' equity. Gains or losses on disposals to non-controlling interest are also recorded in consolidated shareholders' equity.

Disposal of subsidiary

When the Group ceases to have control or significant influence, any retained interest in the entity is remeasured to its fair value, with the change in carrying amount recognized in consolidated statement of profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognized in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed off the related assets or liabilities. This may mean that amounts previously recognized in other comprehensive income are reclassified to consolidated statement of profit or loss.

If the ownership interest in an associate is reduced but significant influence is retained, only a proportionate share of the amounts previously recognized in other comprehensive income are reclassified to profit or loss where appropriate.

Associates

An associate is an entity over which the Group exercises significant influence, but not control. Significant influence is the power to participate in the financial and operating policy decisions of the associate but is not control or joint control over those policies.

**GLOBAL FINANCIAL INVESTMENTS HOLDING SAOG
AND ITS SUBSIDIARIES**

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE PERIOD ENDED 30 SEPTEMBER 2025 (continued)**

3 Material accounting policy information (continued)

Basis of consolidation (continued)

Associates (continued)

The considerations made in determining significant influence or joint control is similar to those necessary to determine control over subsidiaries. The Group's investments in its associates are accounted for using the equity method.

Under the equity method, the investment in an associate is initially recognised at cost. The carrying amount of the investment is adjusted to recognise changes in the Group's share of net assets of the associate since the acquisition date. Goodwill relating to the associate is included in the carrying amount of the investment and is tested for impairment annually.

The consolidated statement of profit or loss reflects the Group's share of the results of operations of the associate. Any change in the other comprehensive income of the associates is presented as part of the Group's other comprehensive income. In addition, when there has been a change recognised directly in shareholders' equity of the associate, the Group recognises its share of any changes, when applicable, in the consolidated statement of changes in shareholders' equity. Unrealised gains and losses resulting from transactions between the Group and the associate are eliminated to the extent of the interest in the associate.

The financial statements of the associate are prepared for the same reporting period as the Group. Wherever necessary, adjustments are made to bring the accounting policies in line with those of the Group.

After application of the equity method, the Group determines whether it is necessary to recognise an impairment loss on its investment in its associate. On an annual basis, the Group determines whether there is objective evidence that the investment in the associate is impaired. If there is such evidence, the Group calculates the amount of impairment as the difference between the recoverable amount of the associate and its carrying value, and recognises the loss as "Share of profit/loss from investment in associates" in the consolidated statement of profit or loss.

Upon loss of significant influence over the associate, the Group measures and recognises any retained investment at its fair value. Any difference between the carrying amount of the associate upon loss of significant influence and the fair value of the retained investment and proceeds from disposal is recognised in the consolidated statement of profit or loss.

Business combinations and goodwill

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred, measured at the acquisition date fair value, and the amount any non-controlling interest in the acquiree. For each business combination, the acquirer measures the non-controlling interest in the acquiree either at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition costs incurred are expensed and included in the administrative expenses.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

If the business combination is achieved in stages, the acquisition date fair value of the acquirer's previously held equity interest in the acquiree is re-measured to fair value at the acquisition date through profit or loss.

Any contingent consideration to be transferred by the acquirer is recognized at fair value at the acquisition date. Subsequent changes to the fair value of the contingent consideration which is deemed to be an asset or liability are recognized in accordance with IFRS 9 either in profit or loss or as a change to other comprehensive income. If the contingent consideration is classified as part of consolidated shareholder's equity, it should not be re-measured until it is finally settled within consolidated shareholder's equity.

Goodwill is initially measured at cost being the excess of the aggregate of the consideration transferred and the amount recognized for non-controlling interest, over the net identifiable assets acquired and liabilities assumed. If this consideration is lower than the fair value of the net assets of the subsidiary acquired. The difference is recognized in consolidated statement of profit or loss.

**GLOBAL FINANCIAL INVESTMENTS HOLDING SAOG
AND ITS SUBSIDIARIES**

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE PERIOD ENDED SEPTEMBER 2025 (continued)**

3 Material accounting policy information (continued)

Basis of consolidation (continued)

Business combinations and goodwill (continued)

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units that are expected to benefit from the combinations, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

Where goodwill forms part of a cash-generating unit and part of the operation within that unit is disposed off, the goodwill associated with the operation disposed-off is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Goodwill disposed-off in this circumstance is measured based on the relative values of the operation disposed-off and the portion of the cash-generating unit.

Financial instruments

Recognition, initial measurement and derecognition

Financial assets and financial liabilities are recognised when the Group becomes a party to the contractual provisions of the financial instrument. Financial liabilities are not recognised unless one of the parties has performed its part of the contract or a contract is a derivative contract.

All financial assets and liabilities are initially measured at cost which is the fair value of the consideration given or received. Transaction cost that are directly attributable to the acquisition or issue of the financial assets and liabilities (other than financial assets or financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of financial assets or liabilities, as appropriate, on initial recognition.

Financial assets are derecognised when the contractual rights to the cash flows from the financial asset expire, or when the financial asset and substantially all the risks and rewards are transferred. A financial liability is derecognised when it is extinguished, discharged, cancelled or expires.

Classification of financial assets

The financial assets are classified in the following categories:

- Amortised cost
- Fair value through profit or loss (FVTPL)
- Fair value through other comprehensive income (FVTOCI)

The Group determines the classification of financial assets based on the business model it uses to manage the financial assets and the contractual cashflow characteristics of the financial assets.

Business model assessment

The Group determines its business model at the level that best reflects how it manages group of financial assets to achieve its business objective. The Group's business model is not assessed on an instrument-by-instrument basis but at a higher level of aggregated portfolios and is based on a number of observable factors.

The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice;
- the risks that affect the performance of the business model and how those risks are managed; and
- the frequency, volume and timing of sales in prior periods, the reasons for such sales and its expectations about

Contractual cash flow characteristics test

The Group assesses whether the financial instruments' cash flows represent Solely Payments of Principal and Interest (the 'SPPI'). The most significant elements of interest within a lending arrangement are typically the consideration for the time value of money and credit risk.

The Group reclassifies a financial asset when and only when its business model for managing those assets changes. The reclassification takes place from the start of the first reporting period following the change. Such changes are expected to be very infrequent.

**GLOBAL FINANCIAL INVESTMENTS HOLDING SAOG
AND ITS SUBSIDIARIES**

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE PERIOD ENDED SEPTEMBER 2025 (continued)**

3 Material accounting policy information (continued)

Financial instruments (continued)

Subsequent measurement of financial assets

Financial assets at amortised cost

Financial assets are measured at amortised cost if the assets meet the following conditions (and are not designated as FVTPL):

- they are held within a business model whose objective is to hold the financial assets and collect its contractual cash flows; and
- the contractual terms of the financial assets give rise to cash flows that are solely payments of principal and interest on the principal amount outstanding

After initial recognition, these are measured at amortised cost using the effective interest method. Discounting is omitted where the effect of discounting is immaterial. Gains or losses are also recognised in the statement of profit or loss when financial assets carried at amortised cost are de-recognised or impaired.

Financial assets at fair value through other comprehensive income (FVTOCI)

The Group accounts for financial assets at FVTOCI if the assets meet the following conditions (and is not designated as

- they are held under a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- the contractual terms of the financial assets give rise to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition, for an equity investment that is not held for trading, the Group may irrevocably elect to present subsequent changes in fair value in OCI. Only dividend income is recognised in a consolidated statement of profit or loss. The selection is made on an investment-by-investment basis.

FVTOCI financial assets are subsequently measured at fair value with gains and losses arising due to change in fair value recognised in OCI.

Financial assets at fair value through profit or loss (FVTPL)

Financial assets held within a different business model other than 'hold to collect' or 'hold to collect and sell' are categorised at FVTPL. Further, irrespective of the business model used, financial assets whose contractual cash flows are not solely payments of principal and interest are accounted for at FVTPL.

Assets in this category are measured at fair value with gains or losses recognised in the consolidated statement of profit or loss.

Impairment of financial assets

IFRS 9's impairment requirements use forward-looking information to recognise expected credit losses the 'expected credit loss (ECL) model'. Instruments within the scope of ECL requirements included loans and other debt-type financial assets measured at amortised cost and FVTOCI, contract receivables, contract assets recognised and measured under IFRS 15 and loan commitments and some financial guarantee contracts (for the issuer) that are not measured at fair value through profit or loss.

The Group considers a broader range of information when assessing credit risk and measuring expected credit losses, including past events, current conditions, reasonable and supportable forecasts that affect the expected collectability of the future cash flows of the instrument.

In applying this forward-looking approach, a distinction is made between:

- financial instruments that have not deteriorated significantly in credit quality since initial recognition or that have low credit risk ('Stage 1'); and
- financial instruments that have deteriorated significantly in credit quality since initial recognition and whose credit risk is not low ('Stage 2').

Stage 3 would cover financial assets that have objective evidence of impairment at the reporting date.

12-month expected credit losses' are recognised for the first category while 'lifetime expected credit losses' are recognised for the second and third category

Measurement of the expected credit losses is determined by a probability-weighted estimate of credit losses over the expected life of the financial instrument.

**GLOBAL FINANCIAL INVESTMENTS HOLDING SAOG
AND ITS SUBSIDIARIES**

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE PERIOD ENDED SEPTEMBER 2025 (continued)**

3 Material accounting policy information (continued)

Classification and subsequent measurement of financial liabilities

Subsequently, financial liabilities are measured at amortised cost using the effective interest method except for derivatives and financial liabilities designated at FVTPL, which are carried subsequently at fair value with gains or losses recognised in profit or loss (other than derivative financial instruments that are designated and effective as hedging instruments).

All interest-related charges and, if applicable, changes in an instrument's fair value that are reported in the statement of profit or loss and other comprehensive income are included within 'finance costs' or 'other income'.

Property and equipment

Property and equipment are stated at historical cost or valuation less accumulated depreciation and any impairment in value, except for freehold land which is not depreciated.

Freehold land is measured at fair value less impairment losses recognised after the date of the revaluation. Valuations are performed frequently to ensure that the fair value of a revalued asset does not differ materially from its carrying amount.

Any revaluation surplus is credited to the property revaluation reserve included in shareholders' equity in the consolidated statement of financial position, except to the extent that it reverses a revaluation decrease of the same asset previously recognised in profit or loss, in which case the increase is recognised in profit or loss. A revaluation deficit is recognised in profit or loss, except to the extent that it offsets an existing surplus on the same asset recognised in the property revaluation reserve.

Depreciation is calculated on a straight-line basis over the estimated useful lives of the assets as follows:

Description	Number of years
Buildings	10-25
Motor vehicles	3-5
Furniture and fixtures and office equipment	3-10
Others	5

Freehold land is not depreciated as it is deemed to have an indefinite useful life

An item of property and equipment is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gains or losses arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the consolidated statement of profit or loss when the asset is derecognised.

The assets' residual values, depreciation methods and useful lives are reviewed and adjusted, if appropriate, at the end of each reporting period. An asset's carrying amount is written-down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Impairment of non-financial assets

For the purpose of assessing impairment, assets are grouped at the lowest levels for which there are identifiable cash flows (cash-generating units). As a result, some assets are tested individually for impairment, and some are tested at cash-generating unit level.

Individual assets or cash-generating units with an indefinite useful life or those not yet available for use are tested for impairment at least annually. All other individual assets or cash-generating units are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

An impairment loss is recognised for the amount by which the asset's or cash-generating unit's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of fair value, reflecting market conditions less costs of disposal and value-in-use, based on an internal discounted cash flow evaluation. All non-financial assets are subsequently reassessed for indications that an impairment loss previously recognised may no longer exist. An impairment loss is reversed if the assets or cash-generating units recoverable amount exceeds its carrying amount.

**GLOBAL FINANCIAL INVESTMENTS HOLDING SAOG
AND ITS SUBSIDIARIES**

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE PERIOD ENDED 30 SEPTEMBER 2025 (continued)**

3 Material accounting policy information (continued)

Inventories

Inventories are stated at the lower of cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated cost of completion and selling expenses. The cost of inventories is based on the weighted average principle and includes expenditure incurred in acquiring the inventories and bringing them to their existing location and condition. In the case of finished goods and work-in-progress, cost includes an appropriate share of overheads based on normal operating capacity.

Cash and cash equivalents

For the purpose of presentation in the consolidated statement of cash flows, cash and cash equivalents includes cash on hand, bank balances, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, less bank overdrafts. Bank overdrafts are disclosed within bank borrowings in current liabilities in the consolidated statement of financial position.

Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable. The Group's revenue is recognised either over a period-of-time or at a point-in-time i.e. when the amount of revenue can be reliably measured; when it is probable that future economic benefits will flow to the Group; and when specific criteria have been met for each of the Group's activities, as described below.

Dividend income is recognised when the right to receive payment is established.

Brokerage income is recognised on completion of each deal.

Realised gains or loss on dealing in securities is recognised upon completion of the sale, which represents the difference between sale proceeds and cost of securities sold, calculated on a weighted average basis.

Interest income is recognised on a time-proportion basis using the effective interest method.

Revenue from education services rendered is recognised in the profit or loss over the period the education service is provided to the students, as the students, simultaneously receive and consume the benefits provided by the Group's performance. Revenue is recognised in proportion to the stage of completion of the transaction in the accounting period in which the services are rendered and the right to receive the consideration is established. No revenue is recognised if there are significant uncertainties regarding the recovery of the consideration due.

Foreign currency transactions and balances

Foreign currency transactions are translated into the functional currency of the Group, using the exchange rates prevailing at the dates of the transactions (spot exchange rate). Foreign exchange gains and losses resulting from the settlement of such transactions and from the re-measurement of monetary items of consolidated statement of financial position at year-end exchange rates are recognised in the consolidated statement of profit or loss.

At each reporting date, all monetary assets and liabilities denominated in foreign currencies are translated into Rial Omani at the rate of exchange prevailing at the reporting date.

Non-monetary items are not retranslated at the period end. They are measured at historical cost (translated using the exchange rates at the transaction date), except for non-monetary items measured at fair value which are translated using the exchange rates at the date when fair value was determined.

Taxation

Current income tax liabilities and /or assets comprise those obligations to, or claim from, Tax Authorities relating to the current or prior reporting period, that are unpaid at the reporting date. Current tax is payable on taxable profit, which differs from profit or loss in the financial statements. Calculation of current tax is based on tax rates and tax laws that have been enacted or substantively enacted by the end of the reporting period.

Deferred income taxes are calculated using the liability method on temporary differences between the carrying amounts of assets and liabilities and their tax bases.

**GLOBAL FINANCIAL INVESTMENTS HOLDING SAOG
AND ITS SUBSIDIARIES**

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE PERIOD ENDED 30 SEPTEMBER 2025 (continued)**

3 Material accounting policy information (continued)

Taxation (continued)

Deferred tax assets and liabilities are calculated, without discounting, at tax rates that are expected to apply to their respective period of realisation, provided they are enacted or substantively enacted by the end of the reporting period. Deferred tax liabilities are always provided for in full. Deferred tax assets are recognised to the extent that it is probable that they will be able to be utilised against future taxable income. The carrying amount of deferred tax assets is reviewed at each reporting date and the deferred tax assets are reduced to the extent that it is no longer probable that the related tax benefits will be realised.

Deferred tax assets and liabilities are offset only when the Group has a right and intention to set off current tax assets and liabilities from the same Tax Authority.

Employee end of benefits

The provision for employee end of benefits is based upon the liability accrued in accordance with the terms of employment of the Group's employees at the reporting date, having regard to the requirements of the Oman Labour Law, 2023 (replacing Repealed Oman Labour Law, 2003 effective 26 July 2023) and the Social Security Law, 1991.

Government of Oman Social Insurance Scheme (the "Scheme")

The Group contributes to the Scheme for all Omani employees. The Scheme, which is a defined contributions retirement plan, is administered by the Government of Oman. The Group and Omani employees are required to make monthly contributions to the Scheme at prescribed rates of gross salaries.

Non-Omani employee terminal benefits

The provision of staff terminal benefits for non-Omani employees is made in accordance with the requirements of the Oman Labour Law of 2023. Employees are entitled to staff terminal benefits calculated at the rate of 30 days basic salary for each year. This is an unfunded defined benefits retirement plan. Accrued non-Omani staff terminal benefits are payable on termination of employment.

Provisions, contingent liabilities and contingent assets

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the amount can be made.

Provisions are measured at the estimated expenditure required to settle the present obligation, based on the most reliable evidence available at the reporting date, including the risks and uncertainties associated with the present obligation. Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. Long term provisions are discounted to their present value, where the time value of money is material.

All provisions are reviewed at each reporting date and adjusted to reflect the current best estimate of the Group's management.

No liability is recognised if an outflow of economic resources as a result of present obligation is not probable. Such situations are disclosed as contingent liabilities unless the outflow of resources is remote.

Probable inflows of economic benefits to the Group that do not yet meet the recognition criteria of an asset are considered contingent assets.

Directors' remuneration

The Directors' remuneration is governed as set out by the Commercial Companies Law of 2019, as amended, and regulations and the rules prescribed by the Financial Services Authority.

**GLOBAL FINANCIAL INVESTMENTS HOLDING SAOG
AND ITS SUBSIDIARIES**

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE PERIOD ENDED 30 SEPTEMBER 2025 (continued)**

3 Material accounting policy information (continued)

Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the respective assets. All other borrowing costs are expensed in the period they occur. Borrowing costs consist of interest and other costs that the Group incurs in connection with the borrowing of funds.

Dividend on ordinary share

Dividends on ordinary shares are recognised as a liability and deducted from equity when they are approved by the company's shareholders. Dividends for the year that are approved after the reporting date are disclosed as an event after the reporting date. The dividend received from associates is reduced from the carrying value of investment.

Segment reporting

An operating segment is a component of the Group that engages in business activities from which it may earn revenues and incur expense, including revenues and expenses that relate to transactions with any of the Entity's other components, whose operating results are reviewed regularly by the Chief Executive Officer (being the chief operating decision maker) to make decisions about resources allocated to each segment and assess its performance, and for which discrete financial information is available.

Earnings per share

The Group presents basic and diluted earnings per share (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the net profit or loss attributable to ordinary shareholders of the Parent Company by the weighted average number of ordinary shares outstanding during the year. Diluted EPS is determined by adjusting the net profit or loss attributable to ordinary shareholders of the Parent Company by the weighted average number of ordinary shares outstanding for the effects of all dilutive potential ordinary shares.

Net assets per share

The Group presents net assets per share for its ordinary shareholders. Net assets per share is calculated by dividing the net assets attributable to ordinary shareholders by the weighted average number of shares outstanding as at the statement of financial position date.

Leases

The Group assesses at contract inception whether a contract is or contains a lease. That is, if the contract conveys the right to direct the use and obtain substantially all the economic benefits of an identified asset for a period of time in exchange for consideration.

Company as a lessee

The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

a) Right-of-use assets

The Group recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets include the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. The recognised right-of-use assets are depreciated on a straight-line basis over the shorter of its estimated useful life and the lease term. The company also assess the right-of-use assets for impairment when such indicators exist.

**GLOBAL FINANCIAL INVESTMENTS HOLDING SAOG
AND ITS SUBSIDIARIES**

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE PERIOD ENDED 30 SEPTEMBER 2025 (continued)**

3 Material accounting policy information (continued)

Leases (continued)

b) Lease liabilities

At the commencement date of the lease, the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in - substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating a lease, if the lease term reflects the Group exercising the option to terminate. The variable lease payments that do not depend on an index or a rate are recognised as expense in the period on which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses the incremental borrowing rate at the lease commencement date if the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., a change in future payments resulting from a change in index or rate used to determine such lease payments) or a change in the assessment to purchase the underlying asset.

c) Short-term leases and leases of low-value assets

The Group applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases that are considered to be low value. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

Deferred Government grant

Interest subsidy is recognised in the consolidated statement of financial position initially as a deferred Government grant when there is a reasonable assurance that it will be received and that the Group will comply with the conditions attached to it. This deferred Government grant is amortised over the life of the loan to which it relates on a systematic basis in the same periods in which the interest expense is incurred. Amortisation of the deferred Government grant is recognised in the profit or loss.

4 Significant management judgement in applying accounting policies and estimation uncertainty

Preparation of financial statements in accordance with IFRSs requires the Group's management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as at the date of the financial statements and the reported amounts of revenue and expense during the reporting period.

The determination of estimates requires judgments which are based on historical experience, current and expected economic conditions and all other available information. Actual results could differ from those estimates.

Going concern

The management of the Group reviews the consolidated financial position on a periodical basis and assesses the requirement of any additional funding to meet the working capital requirements and estimated funds required to meet the liabilities as and when they fall due. In addition, the shareholders of the Parent Company ensure that they provide adequate financial support to fund the requirements of the Group to ensure the going concern status of the Group.

Estimates and associated assumptions are reviewed on an ongoing basis. Revision to accounting estimates are recognised in the year in which the estimates are revised and in future periods effected.

Impairment of investment in associates including goodwill

Goodwill on acquisition of associates is included in 'investments in associates'. The Company considers impairment of investments in associates when there has been a significant decline in the carrying/market value below its cost or where other objective evidence of impairment exists. The management tests annually whether goodwill has suffered any impairment.

**GLOBAL FINANCIAL INVESTMENTS HOLDING SAOG
AND ITS SUBSIDIARIES**

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE PERIOD ENDED 30 SEPTEMBER 2025 (continued)**

4 Critical accounting estimates and judgments (continued)

Fair value of financial instruments

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques, which are consistent and may involve gathering data from financial markets as well as reputable data providers.

For unquoted investments, a reasonable estimate of the fair value is determined by reference to the market approach (comparable listed companies), discounted cash flows or dividend methods.

Useful lives of property and equipment

The Group's management determines the estimated useful lives of its property and for calculating depreciation. This estimate is determined after considering the expected usage of the asset or physical wear and tear. Management reviews the residual values, depreciation methods and useful lives annually and future depreciation charge is adjusted where the management believes the useful lives differ from previous estimates.

Allowance for impaired trade receivables

When measuring ECL, the Group uses reasonable and supportable forward looking information, which is based on assumptions for the future movement of different economic drivers and how these drivers will affect each other. Loss given default is an estimate of the loss arising on default. It is based on the difference between the contractual cash flows due and that the lender would expect to receive, taking into account cashflows from collateral and integral credit enhancements.

Probability of default constitutes a key input in measuring ECL. Probability of default is an estimate of the likelihood of default over a time horizon, the calculation of which includes historical data, assumptions and expectations of future conditions.

Classification of investments

In the process of applying the Group's accounting policies, management decides on acquisition of an investment whether it should be classified as investments designated at fair value through profit or loss, debt instrument at amortised cost or financial assets at fair value through other comprehensive income. The classification of each investment reflects the management's intention in relation to each investment and is subject to different accounting treatments based on such classification.

Taxation

Uncertainties exist with respect to the interpretation of tax regulations and the amount and timing of future taxable income. Given the wide range of business relationships and nature of the existing contractual agreements, differences arising between the actual results and the assumptions made, or future changes to the assumptions, could necessitate future adjustments to taxable income and expenses already recorded. The Group establishes provisions, based on reasonable estimates, for possible consequences of finalisation of tax assessments of the Group.

The amount of such provisions is based on various factors, such as experience of previous tax assessments and differing interpretations of tax regulations by the taxable entity and the responsible Tax Authority
